PRODUCED BY COURTNEY GOODRICH + JENNA TALBOTT • PHOTOGRAPHED BY JOEL BENJAMIN

## LIVING LARGE

Designing a space with limited square footage can be tricky, but with the right furnishings, chosen for scale and versatility, it can be done with comfort and style. We asked a landscape designer (small outdoor spaces need attention, too) and two interior designers (who both have outstanding examples of making tiny apartments into generous homes elsewhere in this issue) to show us how small can get big results.

► **DOLLSHOUSE FURNITURE** and a framed 8-by-10-inch botanical print illustrate a daring approach to scale.

## SELECTIONS

"I love these paperwhite bulbs, especially in the winter, when it is fun to see the foliage and flowers emerge."

"A single planter or a cluster adds nice warmth and texture to a small space."

"These can be used indoors or outdoors and flip between holding a votive candle and a tea light — a great way to bring candlelight to small outdoor spaces."

6

7

"I love botanical prints as a way to bring nature indoors if your space outside is small."
